

DISTILLATION AT THE HIGHEST LEVEL

Leading Distillation Technology

ShortPath vacuum distillation

When it comes to distillation, we've got you covered. CES is the first company to design and manufacture distillation equipment exclusively for the hemp and marijuana industry. Rather than trying to make changes to existing technology, we created and patented all new equipment specifically designed to meet our customers' needs.

- 100mm high plow head
- Clog-proof condenser
- High-purity head
- FDA Compliant (GRAS) material
- High reliability
- High flow rate
- Low on condition maintenance
- Complete turnkey
- Training available
- Ultra-high vacuum
- Non-grease fittings
- Easy to clean
- Stress free fittings

The **CES ShortPath** is a turnkey fractional distillation system that makes the separation process virtually effortless. And, our short-paths are designed to meet the demand for those who want the highest purity in the least amount of time. Quality and speed with a flexible setup. From our specially-designed glassware, vacuum pump, and custom cold trap, we provide everything you need to produce the finest quality distillate down to the last fitting.

Model	Capacity (L)	Footprint	Fraction Speed up to* (kg/hr)	Process Type	Power Requirements
SP12	4-8	24" x 48"	2	Batch	52A 120/1/60
SP22	6-13	24" x 48"	2.8	Batch	54A 120/1/60

*Results may vary depending on water content, operating parameters, chemical compounds, etc.
