

the smart choice

HIGH THROUGHPUT

The SprayVap™ is a continuous, closed loop liquid-liquid phase separation system designed for those who seek to produce high quality oil in a high throughput system with minimal maintenance and labor. Utilizing falling film technology in a safe, non-pressurized, reliable, easy-to-use design, the SprayVap™ quickly and efficiently separates tinctures into two distinct streams, concentrated oil and purified distillate.

When closed looped with the Triple X-tract™ system, SprayVap™ can convert 20 - 100 pounds per hour to oil. Low temperatures and short residence time helps preserve all the essentials for the highest quality oil.

SMART EXTRACTION SYSTEMS

Colorado Extraction Systems manufactures oil extraction, solvent recovery and distillation equipment for a variety of industries. Our extraction and distillation systems utilize cutting-edge precision for total chemical separation. We use only the best in class, Made-in-America components for extraction in the industry today.

CHILLED ALCOHOL EXTRACTION

- VISUAL CONFIRMATION OF SYSTEM HEALTH AND OPERATION
- SHORT RESIDENCE TIME IN HEATING ZONE
- REDUCED FLOOR SPACE REQUIREMENTS (45" X 20") (45" X 44" XL)
- HIGH HEAT TRANSFER COEFFICIENTS DUE TO PARTIAL TWO-PHASE FLOW
- ABILITY TO HANDLE FOAMY LIQUIDS
- FDA COMPLIANT (GRAS)
- SELF-CLEANING
- MINIMAL MOVING COMPONENTS
- LOW, ON-CONDITION MAINTENANCE
- MODULAR DESIGN AND CONSTRUCTION
- CLOSED LOOP, CONTINUOUS FEED
- HIGH RELIABILITY
